

# New value for old ceilings

OWA green circle

**OWA**

### The OWA green circle – helping nature breathe again

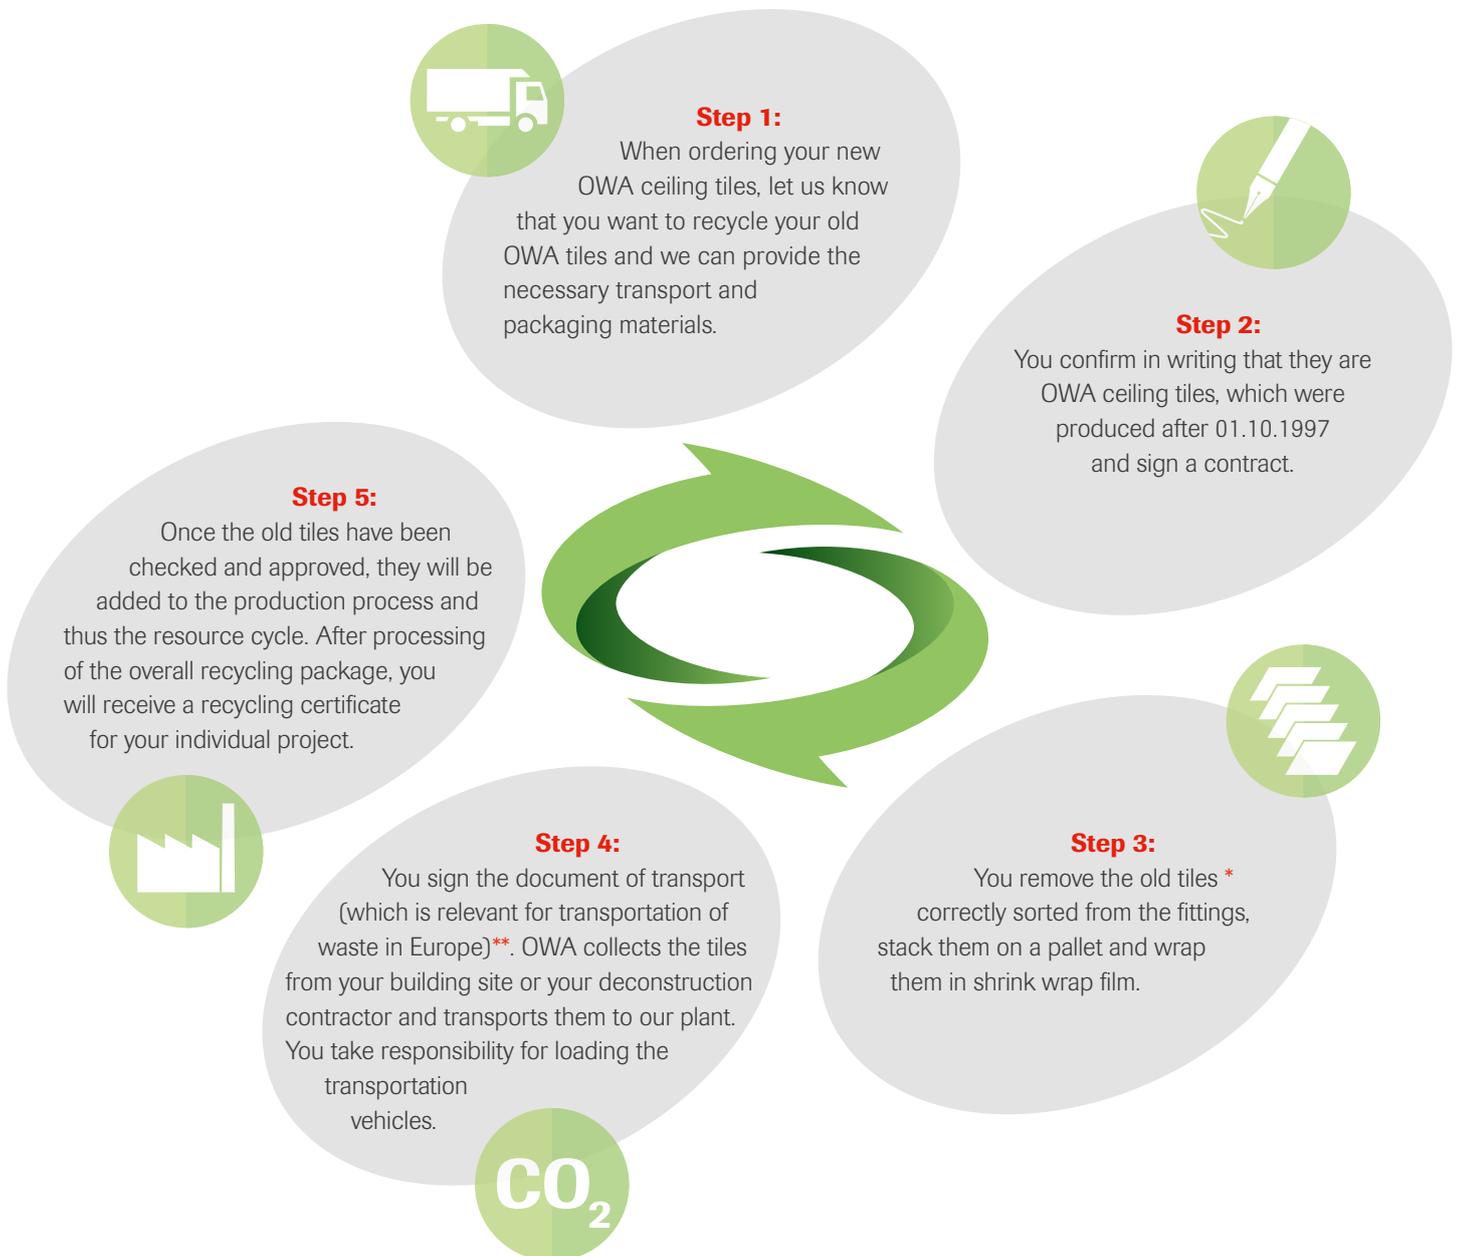

Making the world just a little bit better and more attractive with each project. You want that. We want that, too. This is why we developed the OWA green circle. We take back your old ceiling tiles and therefore close the resource recovery cycle. An important step for us. A big step for your sustainable building concept.

OWA green circle

## The greenest thing that can happen to your old ceiling tiles

We take back your old ceiling tiles and under strict quality control, use them to produce new, high quality tiles. Our strict quality controls ensure optimum use of this recycled material in our new tiles. The procedure is unbelievably simple and takes place in just five steps:

\* other materials, such as wood, metal and plaster, as well as wet, mouldy or otherwise contaminated tiles cannot be returned to us.

\*\* OWA will provide you with the relevant documentation.

**Be green and talk about it!**  
**Advertise with sustainability!**

“Green” publicity is worth its weight in silver; being green is worth its weight in “gold”. Use the certificate, which we customise in line with your specific project, for your property exposé and your corporate communication! The certificate shows the number of recycled square metres.

## RECYCLING CERTIFICATE

Certificate no. \_\_\_\_\_

We hereby certify that \_\_\_\_\_ square metres of old ceiling tiles were recycled during the project listed below. The recycled material will be used to manufacture new OWA ceiling tiles.

Project: \_\_\_\_\_

Processor: \_\_\_\_\_

Date: \_\_\_\_\_

As a result of recycling, waste was avoided and valuable resources were saved. A comparable quantity of new raw materials was therefore saved.

In harmony with nature.  
A moral obligation to people.

Sustainability through the efficient use of raw materials in each ceiling tile: this is what the OWA green circle is all about. But not just that. OWA – market leader for ceiling systems in Germany – helps you improve the sustainability performance of your building, with each process step, project by project ... and you can rest more easily, knowing that you've made an eco-friendly contribution.

- well thought out recycling concept
- up to 100 % of a ceiling tile can be recycled
- production process that reduces energy and water usage
- raw material transport via short routes
- OWAacoustic® ceilings improve well-being and protect health
- OWA products meet the strictest global standards for environmental protection, sustainability and climate protection.

---

Sustainability requires commitment, which will make everything happen, quickly and simply.

Sometimes improvements are just a few clicks away. Our specialists look forward to receiving your call on **+49 93 73 2 01-3 53** or your e-mail at **greencircle@owa.de**. Keyword: OWA green circle.
